Professional Summary

Technical game designer with 8 years of experience across independent, academic, and commercial games. Specializes in Unity/C#, gameplay prototyping, systems design, and UI/UX design and implementation.

Skills

Programming & Tools: C#, C++, Python, C, Unity, Godot, FMOD, UniTask, Git, Perforce, Google Sheets, Notion, Figma
Implementation: Gameplay & UI programming, spreadsheet workflows, Unity Editor tools & level editors, design patterns
Design: Level & systems design, game mechanics, UI/UX, game balancing, gameplay prototyping, playtesting, QA

Experience

CreSpirit Hsinchu, Taiwan
CreSpiritTalker - **UI/UX Tool Programmer (Contract)** Nov 2024 - Jun 2025

- Developed Unity Editor tools with reusable ScriptableObject dialogue databases for authoring visual novel scenes.
- Enabled dialogue effects, object control, and branching conversations through custom commands with async/await support.
- Created reusable UI templates, Google Sheets-to-JSON dialogue imports, and per-language fonts for localized visual novels.

Last Command: B-Side (Released DLC) - **Technical Game Designer Intern** Feb 2024 - Jun 2024

- Designed and implemented a shape-fitting puzzle minigame to provide relaxed pacing between boss encounters.
- Built a Unity Inspector level editor for configuring puzzle layouts and available blocks without editing code.
- Refined puzzle controls and board/inventory navigation through playtesting and UI/UX reference analysis.

Selected Projects

What Does This Sound Like? - **Technical Game Designer** Aug 2026 - Present

- Originated a Foley-inspired puzzle game concept and contributed to mechanics and level design on a 7-person team.
- Built a readable, extensible prefab-based level system for configuring interactions, colliders, sounds, and event sequences.
- Automated FMOD event assignment by object/action names and linked gameplay states to interaction and animation controls.

You Hive My Word - **Technical Game Designer (Solo Project)** Jun 2025 - Present

- Designed and programmed progression and upgrade systems for a word-production game as a solo developer.
- Combined spreadsheet-based workflows with player-progress logging to balance progression and analyze playtest results.
- Streamlined gameplay by removing secondary management mechanics and clarifying scoring feedback based on playtests.

Project Fusion - **Technical Game Designer** Apr 2023 - May 2024

- Prototyped artifact fusion mechanics that grant combat abilities in a turn-based boss-rush game in Unity.
- Adapted Unreal's Gameplay Ability System concepts into Unity, using modular abilities and effects.
- Designed and programmed animated combat UI to communicate turn order, available actions, and targeting.

Survivor For the Feast - **Technical Game Designer** Sep 2022 - Jan 2023

- Integrated combat, gathering, and cooking through 144 dishes that grant skills and stack their effects.
- Tuned ingredients, recipes, enemies, skills, and weather across 6 biomes and 3 playable classes.
- Coordinated a 5-person team's milestones and task assignments while programming the gameplay UI.

Education

Carnegie Mellon University Pittsburgh, PA
Master of Entertainment Technology Expected May 2027

National Tsing Hua University Hsinchu, Taiwan
Bachelor of Science in Computer Science Jun 2024
