Education

National Tsing Hua University, BS in Computer Science

Sep 2020 - Jun 2024

- GPA: 3.72 / 4.3

Experience

Game Programmer and Designer Intern, CreSpirit – Hsinchu, Taiwan

Feb 2024 – Jun 2024

- Prototyped an ongoing project's mini-game with iterative development, allowing rapid adjustments based on feedback in the development cycle.
- Supported design tasks including conceiving storyline and multi-language management and correction.

Independent Study, VL Lab at National Tsing Hua University – Hsinchu, Taiwan

Feb 2023 – Jan 2024

- Topic: Development of Unique Turn Base Combat Game "Project Fusion"
- Constructed a skill part-based system in which skills were set of string to be parsed in the game, thus letting create and change skill's effects easier via Google spreadsheet.

Projects

Project Fusion - an auto battler game featuring a unique fusing artifact mechanic

Apr 2023 - Present

Leader, Programmer, Designer

- Recreated GAS from Unreal Engine to Unity for more scalability development during prototyping, and modified it with an additional policy system to let passive abilities correctly triggered in different conditions.
- Implemented model-view-controller structure for the UI system by interface class for lower coupling codes.

You Ken-Do It - a VR kendo game focused on Block & Counter mechanic

Mar 2023 - Jun 2023

Leader, Programmer, Designer

- Produced a VR game that could also serve training purposes via different difficulties' level design in Unity.
- Experimented with different UI/UX designs and launched several play tests, making users get used to VR more easily.

Survivor For the Feast - a survivor-like feature hunting, collecting, and cooking

Sep 2022 - Jan 2023

Leader, Programmer, Designer, Art

- Headed the development with agile methodology, prioritized different tasks to assign them dynamically, resulting in high completeness project within 4 months
- Designed the core gameplay and incorporated various mechanics to enrich the game, including skill design, ingredient combinations, parameter adjustments, user interfaces, and more.

An Extra Ordinary YouTube Video - a bullet hell game with rewind mechanic

Apr 2022 - Jun 2022

Leader, Programmer, Designer

- Developed object pooling for bullets with Cocos, preventing potential FPS drops in this web game.
- Established a level editor by applying instruction-based Boss script and bullet attack patterns, making the whole level rewindable and easy to construct.

Game Jams

- Created **Lost in Dungeon** as programmer and designer during Global Game Jam 2021 with Unity.
- Created **Deal Da Time** as leader, programmer, and designer during GMTK Jam 2023 with Unity.
- Created **Duplicate Solution Unacceptable** as solo developer during GMTK Jam 2024 with Godot.

Skills

Programming: C#, Unity, Cocos, Python, C, C++, Godot, HTML

Honors & Awards

Jan 2023 - **Best Game Design** in Student Innovation Game Design Competition among 26 games

Jan 2023 - **Best Game** in Game Development Course at National Tsing Hua University among 18 teams

Jun 2023 - **Honorable Mention** in the League of VR Courses Final Exhibition among three universities
