Education

Carnegie Mellon University , MS in Entertainment Technology	Aug 2025 - May 2027
• GPA: - / -	
National Tsing Hua University , BS in Computer Science	Sep 2020 - Jun 2024
• GPA: 3.72 / 4.3	

Experience

Game Programmer and Designer Intern , CreSpirit – Hsinchu, Taiwan	Feb 2024 – Jun 2024
• Prototyped an ongoing project's mini-game with iterative development, allowing rapid adjustments based on feedback in the development cycle.	
• Supported design tasks including conceiving storyline and multi-language management and correction.	

Projects

Vocabulary - An incremental game about spelling words to gain numbers <i>Solo Dev</i>	Jun 2025 - Present
• A prototype game under continuous iteration to refine its core mechanics.	
CreSpiritTalker - A Unity editor tool designed to help users create visual novel scenes <i>Solo Dev</i>	Nov 2024 - Jun 2025
• A highly customizable Unity editor tool featuring its own dedicated editor window.	
• Designed for creating both visual novel-style games and general in-game dialogue interfaces.	
• Supports embedding text commands directly into dialogues, with full support for developer-defined custom commands.	
Project Fusion - an auto battler game featuring a unique fusing artifact mechanic <i>Leader, Programmer, Designer</i>	Apr 2023 - May 2024
• Recreated GAS from Unreal Engine to Unity for more scalability development during prototyping, and modified it with an additional policy system to let passive abilities correctly triggered in different conditions.	
• Implemented model-view-controller structure for the UI system by interface class for lower coupling codes.	
You Ken-Do It - a VR kendo game focused on Block & Counter mechanic <i>Leader, Programmer, Designer</i>	Mar 2023 - Jun 2023
• Produced a VR game that could also serve training purposes via different difficulties' level design in Unity.	
• Experimented with different UI/UX designs and launched several play tests, making users get used to VR more easily.	
Survivor For the Feast - a survivor-like feature hunting, collecting, and cooking <i>Leader, Programmer, Designer, Art</i>	Sep 2022 - Jan 2023
• Headed the development with agile methodology, prioritized different tasks to assign them dynamically, resulting in high completeness project within 4 months	
• Designed the core gameplay and incorporated various mechanics to enrich the game, including skill design, ingredient combinations, parameter adjustments, user interfaces, and more.	

Skills

Programming: C#, Unity, Cocos, Python, C, C++, Godot, HTML
Game Dev: Design, Project Management, Pixel Art

Honors & Awards

Jan 2023 - **Best Game Design** in Student Innovation Game Design Competition among 26 games
 Jan 2023 - **Best Game** in Game Development Course at National Tsing Hua University among 18 teams
 Jun 2023 - **Honorable Mention** in the League of VR Courses Final Exhibition among three universities
